

# 10 Promising Practices to reduce social inequities in health:

*What does the evidence tell us?*

## Promising Practice #9: Community Engagement

As a strategy to reduce health inequities, community engagement is the process of involving community stakeholders in the development and implementation of policies, programs, and services. In *Closing the gap in a generation*, the World Health Organization highlights the need to “empower all groups in society through fair representation in decision-making about how society operates, particularly in relation to its effect on health equity, and create and maintain a socially inclusive framework for policy-making.”<sup>1</sup>

Working with community professionals and agency representatives is one approach to engagement. However, building relationships with target populations and service users is also key to identifying community strengths and challenges. Engaging diverse community members in the development and implementation of policies, programs, and services builds awareness and skills of participants and increases the likelihood that programs are appropriate and responsive to community needs.

### The “10 Promising Practices” to Reduce Social Inequities in Health at the Local Public Health Level

1. Targeting With Universalism
2. Purposeful Reporting
3. Social Marketing
4. Health Equity Target Setting
5. Equity-Focused Health Impact Assessment
6. Competencies/Organizational Standards
7. Contribution to Evidence Base
8. Early Childhood Development
- 9. Community Engagement**
10. Intersectoral Action

As part of a Canadian Health Services Research Foundation Fellowship (Executive Training in Research Application – EXTRA), the Sudbury & District Health Unit conducted a review and analysis of the literature for practices to reduce social inequities in health. These fact sheets present the 10 practices, relevant at the local public health level, that were found to be “promising” in their potential to “level-up” and reduce health inequities.

The complete EXTRA Fellowship reports are available at [www.sdhu.com](http://www.sdhu.com).
