

10 Promising Practices to reduce social inequities in health:

What does the evidence tell us?

Promising Practice #10: Intersectoral Action

A comprehensive strategy to promote health includes health care when individuals are ill and addresses the underlying causes of poor health where people live, work, learn, and play. These underlying causes are, in part, the result of social, economic, and political actions from different community sectors and all levels of government and industry. Safe and affordable housing, access to parks and recreational activities, quality health care, early childhood education, safe streets, public transportation, and opportunities for meaningful employment are just some of the many factors that influence an individual's opportunities for health and well-being.

Intersectoral action is critical to building health for all because many of the solutions to addressing social inequities in health lie outside of the health sector. Building strong and durable relationships between public health and other sectors (for example, education, municipal, transportation, environment, finance) is necessary for effective action to build healthy communities and reduce social inequities in health.

The “10 Promising Practices” to Reduce Social Inequities in Health at the Local Public Health Level

1. Targeting With Universalism
2. Purposeful Reporting
3. Social Marketing
4. Health Equity Target Setting
5. Equity-Focused Health Impact Assessment
6. Competencies/Organizational Standards
7. Contribution to Evidence Base
8. Early Childhood Development
9. Community Engagement

10. Intersectoral Action

As part of a Canadian Health Services Research Foundation Fellowship (Executive Training in Research Application – EXTRA), the Sudbury & District Health Unit conducted a review and analysis of the literature for practices to reduce social inequities in health. These fact sheets present the 10 practices, relevant at the local public health level, that were found to be “promising” in their potential to “level-up” and reduce health inequities.

The complete EXTRA Fellowship reports are available at www.sdhu.com.
