

Public Health Sudbury & Districts Coronavirus Disease 2019 (COVID-19) Epidemiology Update

These data are based on information available from Public Health Sudbury & Districts as of **6:00 PM May 20, 2020**, unless otherwise specified.

** Note: There may be a lag between the date a case is confirmed by the laboratory to Public Health and the date a case is publicly reported. This is due to the public health follow-up that is required before a case is publicly reported.*

Highlights

As of the time of reporting, among residents of the Public Health Sudbury & Districts service area, there have been:

- **64 confirmed cases** of COVID-19
- **2 deaths**
 - The *case fatality rate* is 3.1%
 - Case Fatality Rate is calculated using the following formula: Total Deaths / Total Confirmed Cases
- **9,883 tests** for COVID-19 completed as of 5:00 PM May 19, 2020
 - The *testing rate* is 4,970 per 100,000 population
 - This total now includes data from ongoing targeted surveillance initiatives in long-term care homes and emergency child care centres.
 - This is calculated using the following formula: Total Confirmed Cases / (Total Tests – Pending Tests)

Of the confirmed cases:

- 37 cases (57.8%) were female
- 24 cases (37.5%) were between the ages of 40 to 59
- 38 cases (59.4%) were cases with an unknown exposure, or their contacts
- 16 cases (25.0%) are related to outbreaks in 8 long-term care homes
 - 1 death is related to outbreaks in long-term care homes

Epidemiology – Sudbury and Districts

Total confirmed cases as of May 20, 2020 at 6:00 PM: **64 Cases**

Cases over time

Notes:

Coordinated targeted surveillance in long-term care homes and emergency child care centres began on Saturday, April 25. This targeted surveillance may account for recent increases in cases seen below. Also, the Integrated Public Health Information Systems (iPHIS) protocols for assigning Onset Date uses the date of testing in absence of other reliable information, which can account for increased numbers since that time.

* Incidence is the number of new cases that have occurred since the beginning of the pandemic

** Prevalence is the number of unresolved cases there currently are in the population

*** This report is based on the most currently available information at date and time of production. Public Health Sudbury & Districts may update this table after the 4 PM deadline for Northern health unit reporting to Ontario Health – North.

† The Public Health Agency of Canada reports the number (and rate) of people tested, rather than the number of tests conducted. The numbers presented here for Testings per 100,000 and % Positive Tests reflect are based on those data.
