

# Public Health Sudbury & Districts

## Coronavirus Disease 2019 (COVID-19)

### Epidemiology Update

These data are based on information available from Public Health Sudbury & Districts as of **6:00 PM September 15, 2020**, unless otherwise specified.

*\* Note: There may be a lag between the date a case is confirmed by the laboratory to Public Health and the date a case is publicly reported. This is due to the public health follow-up that is required before a case is publicly reported.*

## Highlights

As of the time of reporting, among residents of the Public Health Sudbury & Districts service area, there have been:

- **99 confirmed cases** of COVID-19
- **2 deaths**
  - The *case fatality rate* is 2.0%
    - Case Fatality Rate is calculated using the following formula: Total Deaths / Total Confirmed Cases
- **34,772 tests** for COVID-19 completed as of 5:00 PM September 15, 2020
  - The *testing rate* is 17,486 per 100,000 population
  - This total includes data from targeted surveillance initiatives in long-term care homes, emergency child care centres, and retirement homes coordinated by Public Health Sudbury & Districts between April 25 and June 5, 2020.
  - The percent of tests that are positive is 0.3%
    - This is calculated using the following formula: Total Confirmed Cases / Total Tests. Prior to June 8, 2020, tests for which results had not yet been received were removed from this calculation.

Of the confirmed cases:

- 47 cases (47.5%) were female
- 29 cases (29.3%) were between the ages of 40 to 59
- 61 cases (61.6%) were cases with an unknown exposure, or their contacts
- 19 cases (19.2%) related to outbreaks in 10 long-term care homes
  - 1 death is related to outbreaks in long-term care homes

# Epidemiology – Sudbury and Districts

Total confirmed cases as of September 15, 2020 at 6:00 PM: **99 Cases**

## Cases over time

Notes:

External data sources may have slight delays in capturing locally reported cases.

# Case Characteristics

**TABLE 1. Number and Percentage of Confirmed Cases, by Various Characteristics**

Characteristic	Cases since March 11	Percentage (%)	Cases since July 20	Percentage (%)
Numbers of Cases	99	100%	32	100%
Change from previous report	3	3.1%*	3	10.3%*
Gender: Male	33	33.3%	8	25.0%
Gender: Female	47	47.5%	9	28.1%
Gender: Not specified**	19	19.2%	15	46.9%
Ages: 19 and under	19	19.2%	15	46.9%
Ages: 20-39	24	24.2%	5	15.6%
Ages: 40-59	29	29.3%	5	15.6%
Ages: 60-79	23	23.2%	5	15.6%
Ages: 80 and over	4	4.0%	2	6.3%
Ages: Not specified**	0	0.0%	0	0.0%
Area: Greater Sudbury	90	90.9%	29	90.6%
Area: Manitoulin District	4	4.0%	0	0.0%
Area: Sudbury District	5	5.1%	3	9.4%

Data source: Public Health Sudbury & Districts

\*Percent change represents the degree of change over time, calculated: (New-Original)/Original

\*\*Data on gender and age groups are updated when there are sufficient data to ensure individual cases cannot be identified. Gender is not specified for cases 19 aged years and under.

# Case Outcome

**TABLE 2. Case outcomes, by geographic area**

Geographic Area	Total Cases	Resolved Cases	Percent Resolved	Deaths	Case Fatality Rate (CFR)
Sudbury and districts	99	94	94.9%	2	2.0%
Ontario	45,068	42,911	95.2%	2,820	6.3%

Data Source: Public Health Sudbury & Districts and Ontario MOH COVID-19 Update

# Probable Exposure

**TABLE 3. Confirmed Cases, by Probable Exposure, Sudbury and districts**

Exposure	Cases since March 11	Percentage (%)	Cases since July 20	Percentage (%)
Travel-related	24	24.2%	2	6.3%
Contact of a travel-related case	14	14.1%	10	31.3%
No travel and no contact with a known case (unknown exposure)	37	37.4%	15	46.9%
Contact of a case with unknown exposure	24	24.2%	5	15.6%
Pending/undetermined	0	0.0%	0	0.0%

Data Source: Public Health Sudbury & Districts

**FIGURE 5. Confirmed Cases, by date of reporting and probable exposure, Sudbury and districts**

Data source: Public Health Sudbury & Districts

\*Cases with unknown exposure are defined as *No history of travel and no contact with a known case (unknown exposure)* in Table 4, above

**FIGURE 6. Cumulative confirmed Cases, by date of reporting and probable exposure, Sudbury and districts**

Data source: Public Health Sudbury & Districts

\*Cases with unknown exposure are defined as *No history of travel and no contact with a known case (unknown exposure)* in Table 3, above

## Testing

Total number of tests for COVID-19 as of September 15, 2020 at 5:00 PM: **34,772 tests**. This total, and the graphs below, include tests undertaken as part of ongoing targeted surveillance initiatives in long-term care homes, emergency child care centres, and retirement homes coordinated by Public Health Sudbury & Districts between April 25 and June 5, 2020.

**FIGURE 7. Tests in Sudbury and districts, March 30 to September 15, 2020**

Data source: Public Health Sudbury & Districts

# Outbreaks in Facilities

As per the most recent provincial directives, outbreaks of COVID-19 are not automatically declared in long-term care homes and other congregate settings with the confirmation of one case. Public Health assesses each unique situation in determining if an outbreak should be declared, including, for example, occupation, exposures in the home, symptoms of the case, specific risk factors, and local epidemiology.

- In total there have been **10** COVID-19 outbreaks in area facilities; all outbreaks have been in long-term care homes. A total of **19** cases (6 resident cases and 13 staff cases), and **1** death is associated with these outbreaks.
- All outbreaks have now been declared over.

**TABLE 4. Summary of active outbreaks in facilities, Sudbury and districts**

There are currently no active COVID-19 outbreaks in area facilities.

Data Source: Public Health Sudbury & Districts

# Outbreaks in Schools

An outbreak in a school will be declared if there are two or more cases of COVID-19 in a 14-day period that have some link with each other, and with evidence that infection occurred at the school.

- In total there have been **0** COVID-19 outbreaks in area schools, involving a total of **0** cases.

**TABLE 5. Summary of active outbreaks in schools, Sudbury and districts**

There are currently no active COVID-19 outbreaks in area schools.

Data source: Statistics Canada, Government of Canada COVID-19 Update, Ontario MOH COVID-19 Update, integrated Public Health Information System (iPHIS) database, Northwestern Health Unit, Thunder Bay District Health Unit, Algoma Public Health, North Bay Parry Sound District Health Unit, Public Health Sudbury & Districts, Porcupine Health Unit, Timiskaming Health Unit.

\* Incidence is the number of new cases that have occurred since the beginning of the pandemic

\*\* Prevalence is the number of unresolved cases there currently are in the population

\*\*\* This is calculated using the following formula: Total Confirmed Cases / Total Tests. Prior to June 8, 2020, tests for which results had not yet been received were removed from this calculation.

† This report is based on the most currently available information at date and time of production. Public Health Sudbury & Districts may update this table after the 4 PM deadline for Northern health unit reporting to Ontario Health – North.

‡ The Public Health Agency of Canada reports the number (and rate) of people tested, rather than the number of tests conducted. The numbers presented here for Tests per 100,000 and % Positive Tests reflect are based on those data.
