

COVID-19 Vaccination Program

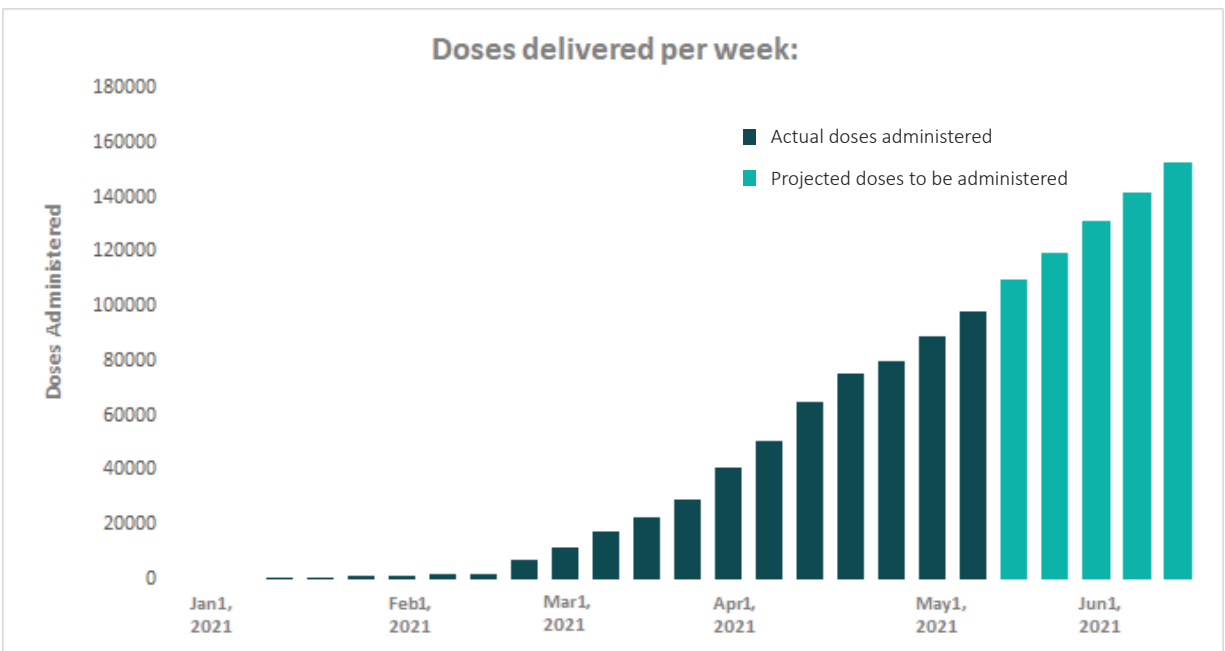

May 20, 2021

Vaccines received and administered

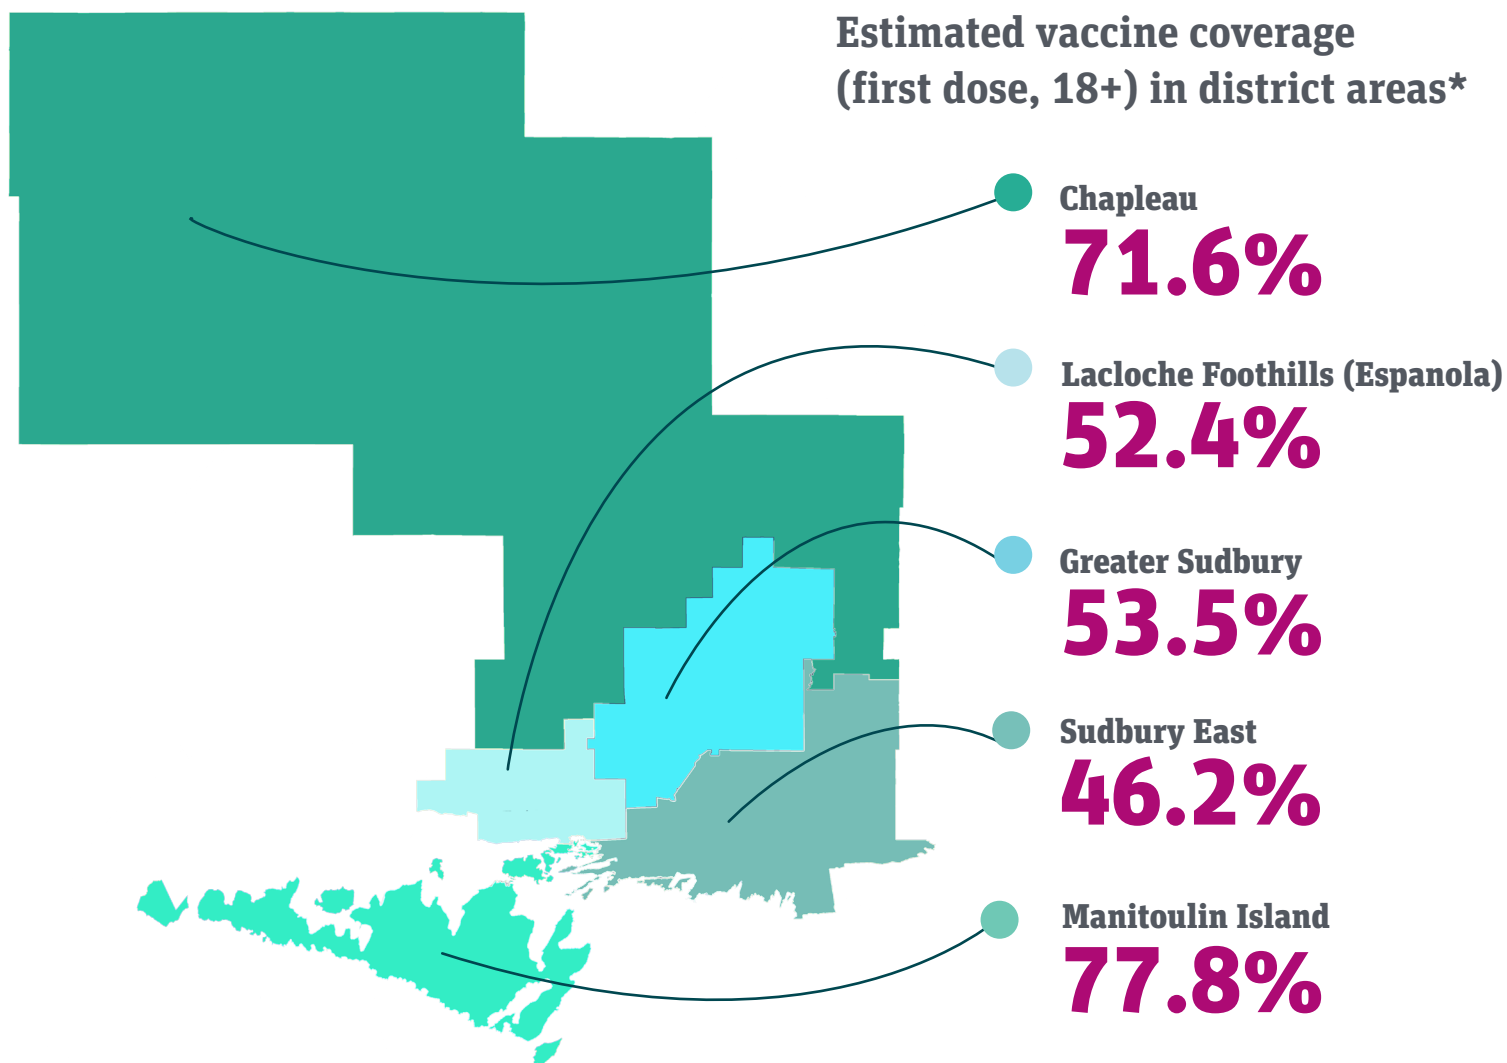

* Doses are based on product monograph and not the actual yield per vial. An additional dose per vial is often obtainable.
Product monograph: Pfizer = 6 doses/vial, Moderna and Astra-Zeneca = 10 doses/vial

Doses delivered per week:

Vaccination coverage

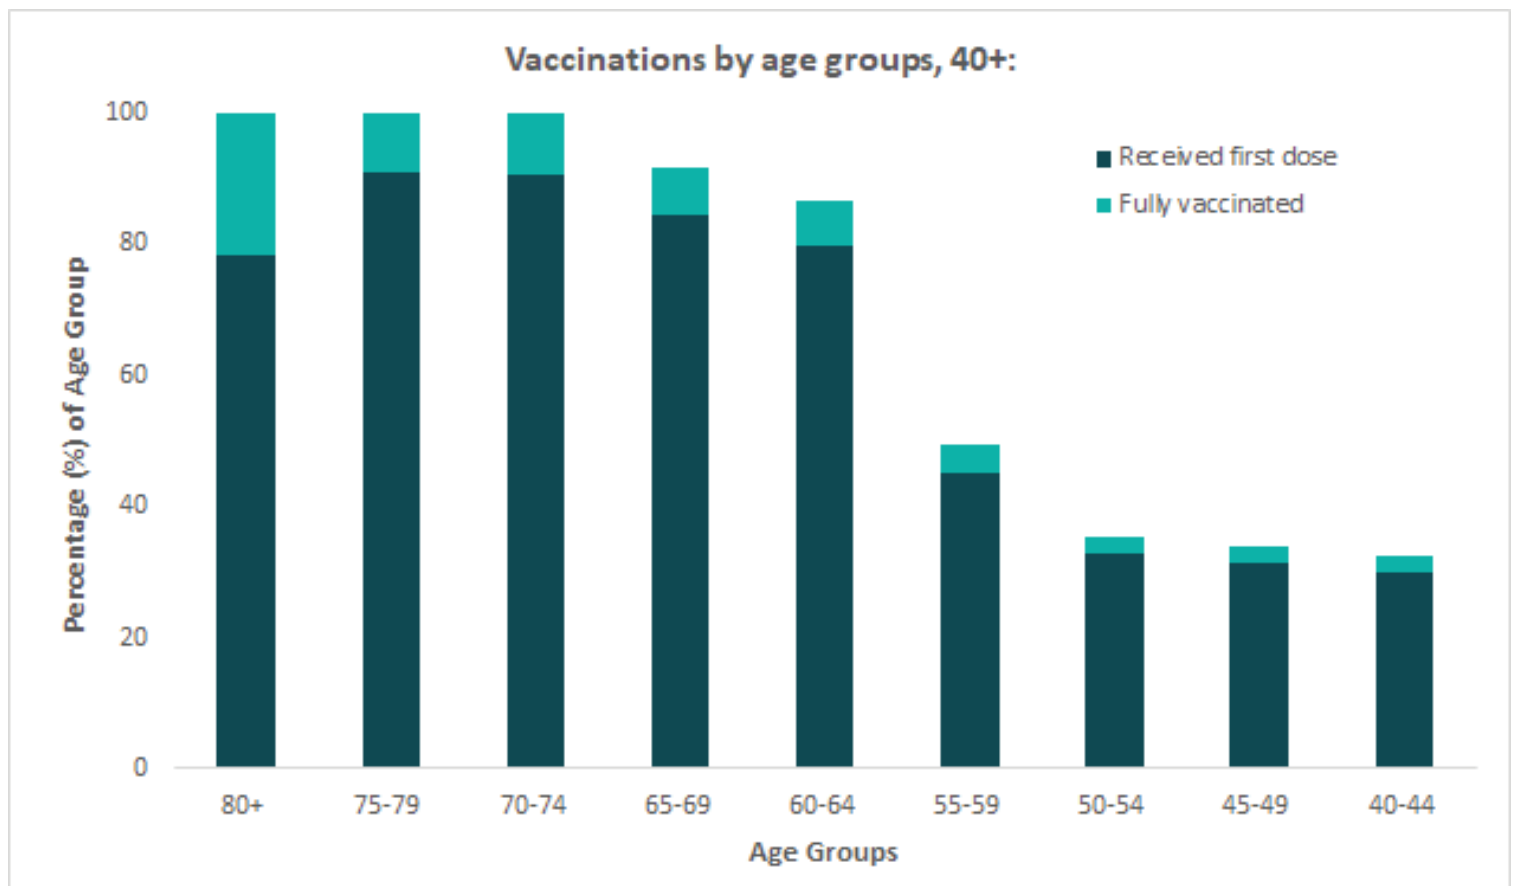

Total coverage for the whole service area **55.0%**

* Coverage is estimated by dividing the number of vaccines administered in area clinics by the total population 18 and over living in that area; this is an estimation as some people living in an area may receive their immunization at a clinics in another area

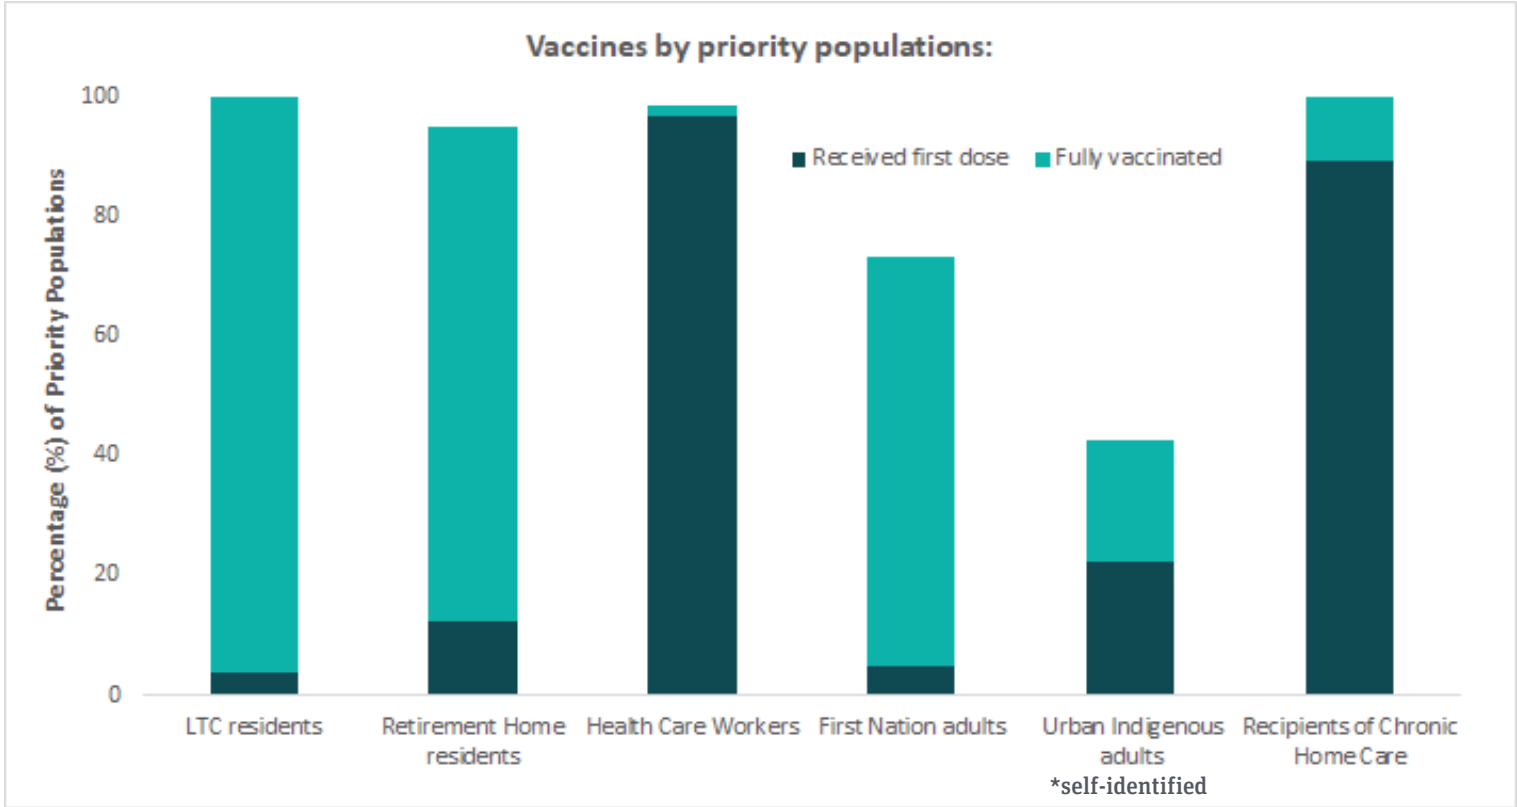

Homebound residents who received a vaccine

494

Vaccinations by age groups, 40+:

Vaccines by priority populations:

Vaccination outcomes

Adverse Events Following Immunization (AEFIs):

Vaccine type	Adverse reactions	Total doses	Percentage of vaccine type
Moderna	58	42 993	0.01%
Pfizer	42	54 890	0.01%
AstraZeneca	3	500	0.06%
Total	103	98 383	0.01%

Vaccination efforts

Committees that support the roll-out efforts:
