

Did you know?

Getting your children vaccinated according to the recommended immunization schedule is one of the most important things parents/guardians can do to protect their child's health. Diseases spread quickly among groups of children who are not vaccinated.

Did you know?

Vaccines are very safe, thoroughly tested before Health Canada approves their use, and carefully monitored after they are licensed to ensure their safety.

Did you know?

Immunization not only protects vaccinated children but entire communities of children by preventing and reducing the spread of infectious diseases.

Did you know?

Reporting your child's immunizations to Public Health Sudbury & Districts will ensure their vaccination record is up to date.

Did you know?

You can report immunizations online at phsd.ca or call 705.522.9200, ext. 458 (toll-free 1.866.522.9200), to ensure your child's record is up to date.

Did you know?

Outbreaks of vaccine preventable diseases occur when children are not vaccinated.

Did you know?

Vaccines protect others, who may be unable to receive vaccines for health reasons which make them vulnerable to disease.

Did you know?

Vaccines are not only recommended during childhood, they are important throughout the lifespan.

Working together - parents and guardians, school communities, and Public Health - we will keep students in the classroom.
